

DELIVERY AT CAPCO

Capco is a global business and technology consultancy dedicated to Financial Services

PEOPLE

Capco's community of delivery experts, including program managers, business analysts, scrum masters, product owners/managers, and business leaders, have experience ranging from rapid solution prototyping and deliveries to multi-year business transformations. We are individuals rooted in strategic change wholly committed to client interests and needs.

Focused on
Your Needs

BUSINESS AND IT SOLUTIONS

Customizable solutions tailored from progressive delivery concepts, lean and agile strategies, and Capco financial industry experience

EXPERIENCE IN ALL METHODOLOGIES

Delivery leaders with deep expertise and advanced certifications in agile, waterfall, and hybrid approaches

TOOLS AND FRAMEWORKS

Tested and refined methodologies applied in conjunction with proprietary delivery tools and analytical frameworks

INDUSTRY SPECIALIZATION

Proven track record of successful delivery initiatives and large-scale implementations across a variety of global financial institutions

CENTERS OF PRACTICE

Enterprise Delivery Transformation

Implementation of Scaled Agile Frameworks

- Strategy, planning, and coaching throughout the delivery transition
- Agile design at both team and organizational levels
- Workshops and training to facilitate managerial/organizational adoption of agile concepts and principles
- Pilot project execution with retrospectives and iterative governance structures based on lessons learned

Product and Project Portfolio Planning and Management

- Scalable, value-driven solutions designed to decrease the complexities of modern delivery portfolios and increase operational effectiveness
- Accelerate innovation and speed to market through more effective problem identification, prioritization, and budget spend

Modern Delivery Execution

End-to-End Delivery Solutions

- Capco combines agile and lean practices to create delivery approaches specifically tailored to achieve client objectives
- Support modern product management and iterative development resulting in increased engineering efficiency

Program Turnaround and Delivery

- Develop and lead the execution of complex program structures and innovative, efficient solution designs
- Capco works alongside clients to develop a current-state analysis of struggling initiatives and develop remediation strategies
- Leverage modern tools to enhance transparency, foster cross-functional collaboration, and encourage dynamic decision-making
